# Sunil A S

Senior data engineer

## CONTACT

**Email**

sunil.slvphsn@gmail.com

**Phone**

+49 1623444932

**Address**

Hamburg

## SKILLS

- Apache Airflow
- Amazon EMR
- Apache Flink
- Apache Kafka
- Apache Spark
- BigQuery
- Data analytics
- Data architecture
- Data Build Tool
- Data infrastructure
- SQL
- Stream processing
- Google Dataproc
- Kubernetes
- Redis
- Oracle Database
- Apache Druid

## LANGUAGES

**German** - Beginner

**English** - Advanced

**Hindi** - Native

**kannada** - Native

## SUMMARY

Senior engineering professional with deep expertise in data architecture, pipeline development, and big data technologies. Proven track record in optimizing data workflows, enhancing system efficiency, and driving business intelligence initiatives. Strong collaborator, adaptable to evolving project demands, with focus on delivering impactful results through teamwork and innovation. Skilled in SQL, Spark, and cloud platforms with strategic approach to data management and problem-solving.

## WORK EXPERIENCE

**Senior Data Engineer** **11/2022 - Present**

**Verve Group - Hamburg, Germany**

Verve Group (Ad Tech) cater billions of Ad Exchange every day. It's one of the prominent Ad Exchange in the world for in-app and web Ads. The Data platform process high volume of data (billions of Ad Requests) and powers the Analytical platform and other KPI's to stack holders and publishers with minimal latency.

- Architected and implemented a highly scalable, multi-region streaming data analytics platform leveraging Apache Druid, Apache Flink, and Apache Kafka, enabling real-time, low-latency data processing and delivering actionable insights from approximately 50TB of daily data.
- Led the end-to-end migration of over 500TB of data infrastructure from AWS to Google Cloud Platform (GCP), utilizing Apache Spark on Google Kubernetes Engine (GKE); reduced storage costs by 35% and increased data processing speeds by 40% through cloud optimization and distributed computing best practices.

- Optimized and automated batch data processing workflows on Apache Spark, enhancing pipeline efficiency, reducing processing time, and supporting high-volume ETL operations.
- Supervised and mentored a team of junior data engineers, providing technical leadership, conducting code reviews, and enforcing best practices in data integration, ETL development, and software engineering.
- Tech Stack: Amazon EMR, S3, Kinesis, Apache Spark, Apache Druid, Looker, Apache Airflow, Google Dataproc, BigQuery.

**Senior Data Engineer** **11/2019 - 11/2022**

**NewsCorp (NTS) - Bengaluru, India**

News Corp is a leading global media and information services company headquartered in New York, operating across news, digital real estate, book publishing, and information services. Its notable assets include Dow Jones (publisher of The Wall Street Journal), HarperCollins, and Realtor.com.

- Engineered an event-driven data ingestion system with Kubernetes, Docker, and Apache Beam; achieved 99.9% data accuracy across 15+ data sources, enhancing the reliability of downstream analytics.
- Designed and implemented robust ETL data pipelines for ingesting and processing asynchronous API-based data sources, optimizing data flow and integration for analytics and reporting.
- Analyzed and optimized end-to-end data pipeline workflows, increasing processing efficiency for high-volume datasets exceeding 5TB daily, resulting in improved system performance and reduced latency.
- Developed and maintained in-warehouse data transformation workflows using Google BigQuery and DBT (Data Build Tool), automating complex data modeling and ensuring data consistency for business intelligence.
- Led training and knowledge transfer sessions for cross-functional teams on new data engineering tools and frameworks, enhancing team proficiency and accelerating technology adoption.

### Senior Data Engineer 09/2016 - 11/2019

**StackRoute Labs, NIIT - Bengaluru, India**

DIKSHA (Digital Infrastructure for Knowledge Sharing) is a national platform for school education, an initiative of National Council for Education Research and Training (NCERT), Ministry of Education, India. Sunbird® (open sourced under MIT license) is a set of configurable, extendable, modular building blocks for learning and human development designed for scale.

- Developed a stream processing platform using Apache Samza to efficiently process millions of telemetry events per day, ensuring high reliability and scalability for real-time analytics.
- Built reporting data products leveraging Apache Spark, enabling advanced analytics and actionable business insights.
- Authored comprehensive documentation and analytic reports, effectively communicating summarized results, data analysis, and key conclusions to stakeholders.
- Contributed to internal process improvement initiatives, driving operational efficiencies and fostering innovation within the team.
- Received an Excellence Award for delivering a high-performance, scalable solution that improved data processing and reporting capabilities.

### Software Developer 03/2015 - 09/2016

**Oracle Financial Service Software Limited - Bengaluru, India**

Oracle Financial Services Software Limited (OFSS) is a leading global provider of technology solutions for the banking and financial services industry. Headquartered in Mumbai, and operating as a subsidiary of Oracle Corporation, OFSS delivers comprehensive software products and IT services-including core banking, risk and compliance, digital banking, and analytics-to financial institutions worldwide.

- Developed and implemented enhancements for core banking modules-including consumer lending and accounting-using Oracle and Java, improving system functionality and supporting key business operations.

- Designed and built tools for data correction and data migration, ensuring data integrity and smooth transitions during system upgrades.
- Refactored and modernized legacy codebases, adopting modular architecture and current development standards to reduce operating costs and enhance maintainability.
- Authored and maintained technical documentation and workflow guides in a private wiki, facilitating onboarding and knowledge transfer for new team members.
- Evaluated, designed, implemented, and optimized relational databases and database applications, improving data accessibility and performance.
- Created and automated scripts and processes for data integration, cleansing, and ongoing maintenance, increasing operational efficiency and data reliability.

**Software Developer** **07/2012 - 03/2015**

**Wipro Technologies - Bengaluru, India**

Wipro Limited is a leading Indian multinational technology company headquartered in Bengaluru, recognized as one of India's Big Six IT services firms.

- Designed and developed a web application for an online car selling platform utilizing Groovy/Grails & Oracle DB for the backend and AngularJS for the frontend, delivering a seamless user experience.
- Analyzed and improved application performance by implementing performance testing with Apache JMeter, resulting in enhanced speed and reliability.
- Created and maintained responsive frontend pages using the Bootstrap framework, ensuring cross-device compatibility and modern UI standards.
- Trained and managed a team of developers and discussed issues in order to provide resolution and apply best practices.

## EDUCATION

**Bachelor** **2012**

**PES Institute of Technology (PES University) * Bengaluru**

Bachelor of Engineering: Electrical And Electronics Engineering
